Arizona Department of Public Safety Exhibit 3 PS18001

CJIS Application Conversion

ITEM - The Arizona Department of Public Safety (AZDPS) is responsible for the effective operation of the central state repository to collect, store and disseminate complete and accurate Arizona Criminal History records and related criminal justice information as mandated by Arizona Revised Statute, A.R.S. 41-1750. Since the existing coding of the CJIS applications utilizes old programming languages and technologies, AZDPS is currently at risk for state-wide failure to the law enforcement and criminal justice agencies we support.

Arizona Department of Child Safety (DCS) CH17002 – CHILDS Replacement Project
Informational Only - UPDATE

ITEM - As part of the core functions, the Arizona Department of Child Safety (DCS) caseworkers spend time to ensure the safety of children, strengthen families, and achieve permanency. The current system used for case management, federal reporting, and provider management is the Children's Information Library and Data Source, known as CHILDS. CHILDS was originally implemented in 1997, and due to the age, complexity, and inefficiencies, DCS is unable to provide the best support for the caseworkers or the children and families that they serve.

Linda Jewel Presenting – assistant director DCS
Update: overall yellow still trending green
